

TOP 48

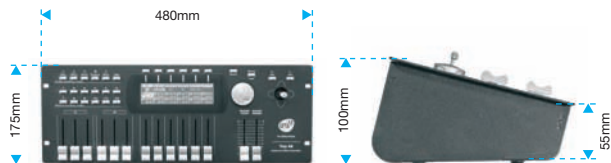

The new TOP 48 by D.T.S. represents a real evolution in the compact DMX controllers range, as it packages a series of powerful features into a small and easy to use unit.

TOP 48 is a state-of-the-art DMX controller suitable for managing mid-size lighting systems.

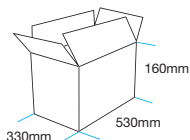

TOP 48 combines a robust hardware with a comprehensive software including a large fixture library and a user-editable Shape Generator.

The internal software is updatable from pc (internal 16 Mbit flash memory).

TOP 48 is easy to use and program, thanks to an ergonomic interface including graphic display and user-assignable sliders. TOP 48 can be used a desk-top console or can be rack-mounted (4 rack units).
