

## Access Reader 8800

- ▶ **Aesthetic looking appearance**
- ▶ **Highly reliable and consistent read range characteristic with low power consumption in a single and easy to install package**
- ▶ **Models available supporting either HID proximity, 'EM' proximity, and MIFARE card technology**
- ▶ **Compliant with industrial standard 26-bit wiegand protocol to Interface with any wiegand standard access control System**
- ▶ **Works well with Access Easy Controller**
- ▶ **Bicolored LED indicators for 'Power', 'Status', 'Alarm', and 'Armed' with audible buzzer**
- ▶ **Attractive silver metallic front and pantone charcoal colored based enclosure for surface mounting.**
- ▶

ARD 8800 provides an aesthetic looking, robust, reliable, versatile, and easily deployable solution for any card access controlled System using the industry standard 26-bit Wiegand protocol. Versatile model designs to support the current ID card technology from HID proximity, 'EM' proximity, or MIFARE contactless smartcard are available.

ARD 8800 enclosure house both a controller board and a separate HID proximity, 'EM' proximity, or MIFARE reader module allowing easy surface mounting and installation for either indoor or outdoor in any location. Its sealed polycarbonate enclosure, designed to withstand harsh environment, is both vandal and water proof. With a bicolored LED indicators for 'Power', 'Status', 'Alarm', and 'Armed', ARD 8800 is well suite for any physical access control System.

Readers using MIFARE technology is design to read the card serial number (CSN) from any MIFARE contactless smartcards for security authentication.

**Installation/Configuration Notes**

**Dimensions**

**Wiegand Protocol**

Wiegand Protocol (26 bits) - The 26 bits Wiegand format consists of a 26 bit long serial stream consisting of 24 data bits and leading and trailing parity bits. The leading bit in the stream is set to generate an even parity for the first 13 bits transmitted while the trailing bit is set to result in an odd parity for the final 13 bits transmitted.

P: Parity bits D: Data Bits

Wiegand 26-bit Data Protocol

**Technical Specifications**

**Dimensions**

Enclosure (H x W x D)	140 x 110 x 40 mm (5.512 x 4.431 x 1.575 inch)
Weight	300 grams (10.537 oz)

**Environmental**

Relative Humidity	0% to 90% non-condensing
Temperature (Operating)	0 °C to +50 °C (32 °F to 120 °F)
Temperature (Storage)	0 °C to +55 °C (32 °F to 130 °F)

**Controller Board**

Functions	Internal or external status control
LED	4 external LED status control
Buzzer	1 external buzzer status control
Tamper	1 tamper monitoring

**HID Proximity Reader Module**

Card Supported	26 bits or 44-bits"EM" card
Transmid Frequency	125 KHz
Excite Frequency	125 KHz
Read Range	Up to 3 - 7,62 cm (1,5 - 3 inch) depends an cardtype and installation enviroment conditions

**"EM" Proximity Reader Module**

Card Supported	26 bits or 44-bits"EM" card
Operating Frequency	125 KHz
Read Range	Up to 8 cm (3.15 inch) depends an cardtype and installation enviroment conditions

**MIFARE Reader Module**

Card Supported	MIFARE card
Operating Frequency	13,56 MHz
Communication	Bi-directional data transmission speed at 106 Kbit/sec.
Read Range	Up to 7 cm (3 inch) depends an card-type and installation enviroment conditions
Compliance	ISO 14443 Type A Standard

**Interface with Host Controller**

Interface	Industrial Standard 26-bits Wiegand Output (Data 0, Data 1, and Ground)
	Available only on MIFARE Reader - Optional switch selectable for either 26-bits or 34-bits Wiegand Output

**Cabling Conditions**

Distance	Maximum 150 m (500 ft) to wiegand Host Controller
----------	---

**Color, Enclosure and Mounting**

Color	Silver metallic front and pantone charcoal base
Enclosure Material	ABS (UL94V-0) fully waterproof
Mounting	Surfacemount Uses 4xm4

**Power Requirements**

Power Supply	+12 V DC +-1
Power consumption	200 mA or more
