HALO - iLOFT
VIDEO DOOR ENTRY SYSTEMS

FERMAX

HALO – iLOFT KIT

The design elite

Fermax presents two of our most exclusive products combined in a Kit: **The HALO outdoor panel and iLOFT monitor.** Two high quality elements taking their place among the worldwide elite, having been selected by the **German Ministry of Economy and Technology** as candidates for the national design prize **GERMAN DESIGN AWARD 2009, known as “The Prize of Prizes”**. It is the most prestigious official design award granted in Germany and in which the products selected must have already gained another international prize previously, as HALO and iLOFT did, finishing among the best in Spanish design in the **“Selección Delta 2007 award”**.

DESIGNPREIS
2009

Both the HALO video entry panel and the iLOFT monitor arose from our spirit of innovation and the search for a maximum quality design. This is why elegance, technology and security are essential features in the two, sensations they both transmit separately and which, when united in the same installation, combine to offer a unique impression of top level and exclusiveness to any building or single family home.

Today, Fermax brings them out together in the same kit, already synonymous with success and prestige.

FERMAX

1. HALO panel. Colour camera. Thermometer and clock. Proximity reader.
2. iLOFT Monitor. Colour Video Door Entry System. Flush installation.
“Hands Free” operation.

HALO-iLOFT Kit ref.5712

- Colour video door entry system for single family homes. Includes:
- HALO colour kit panel (ref.5700).
 - Flush box series 5 (ref.8855).
 - iLOFT Monitor (ref.5610).
 - iLOFT monitor flush box (ref.5630).
 - Power supply (ref.4810).
 - 6 proximity cards (ref.2336)

The Interactive Panel

HALO is the interactive digital video entry panel that lets you communicate with the home **easily, just like your mobile phone**. The most sophisticated technology is combined with intuitive use thanks to the large 128 x 128 pixel **LCD display**. An interface with icons, menus and graphic animations make it simple and user friendly.

It is the only panel on the market with a built-in **proximity reader** hidden behind the display, facilitating entrance to the home exclusively to those users with authorization. When you bring the proximity card near the panel, the door opens automatically. **Allows up to 350 users**. Halo has a built-in **colour camera, thermometer and clock**.

HALO PANEL

FERMAX

21 °C
19:07

1. Aluminium profile, concave curved, highly robust and resistant.
2. Large LCD display enables interactive communication with the user. Indicates outside temperature.
3. Access control. Proximity reader concealed behind the display.
4. Includes colour camera with wide angle lens and Pan&Tilt regulation.

The Most Innovative Video Door Entry System

Inside the home, iLOFT sets the perfect balance between the functional communication needs and the elegance and integration required by current architecture. iLOFT is a hands free, compact, extra flat colour monitor. Its essential design is characterized by a transparent polycarbonate

sheet coating a neutral surface, a singular audio output, chromed pushbuttons to activate the basic video entry functions and a 4" TFT screen for maximum quality and clarity. Programming can be done from the monitor.

iLOFT MONITOR

FERMAX

1. Singular audio output. 2. Chromed pushbuttons for video entry function activation. 3. 4" TFT screen for maximum quality and clarity. Essential design. 4. Transparent polycarbonate sheet coating a neutral surface.

Basic installation diagram

Extensions

- Additional monitor without extra power supply.
- 2nd Video Door Entry Access
Requires video switcher (ref.2450).
- Second aerial colour camera (ref.1073).
- Telephone Interface (ref.1088).
