

Wall Mountable Round Analog Clock Synchronizes to Time Code

FEATURES

- **SMPTE, EBU** and **IRIG-B** (modulated and unmodulated) time code driven
- Round 12" (30.5 cm) Face
- Self-correcting to Time Code
- Self-correcting at power up and time code return after loss
- -11.5 to +12 hour, time zone offsets in 30 min increments
- Daylight saving time - US & Canada standard - other countries optional
- Utilizes microprocessor controlled stepper motor for reliable, accurate, and quiet operation.
- Sweep second hand or pulse modes
- Universal AC input voltage & frequency.
- LED Status Indicator

SPECIFICATIONS

INPUTS

- Time code input via BNC.
- Optional twisted pair to BNC adapter available for time code input – specify BNC-pigtail
- Time zone offset and other setup switches accessible on back panel

COMPLIANCE

- CE Marked – available for sale in EU
- FCC, Class B, Emissions

POWER

- 90-265VAC 50/60 Hz
- IEC AC Power Cord
- Specify: US, UK, EURO, or AUS/NZ plugs
- DC option available

PHYSICAL

- 12.5" (31.8cm) Round Black Metal Case with Polycarbonate Lens/Crystal, 4.25" (10.8cm) high
- Weight – 7.6 lbs – 3.45kg
