- Up to 30 minutes of speech on FLASH memory
- Hot plug-in/plug-out
- Microprocessor controlled
- LED at front to indicate status
- Custom specified messages can be delivered
- 1 line board position is used for this board

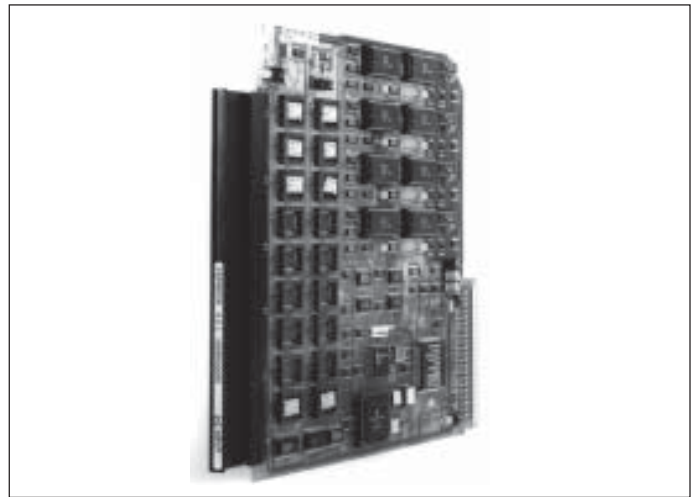

Description

This board gives access to the spoken message features in the AlphaCom system. It has its own microprocessor, RAM and ROM, to control sequencing of messages.

A set of pre-recorded absence and other voice messages is available, with user input of dates, times, telephone numbers, etc., for added flexibility.

The board provides voice help for default functions in the intercom system. The help messages prompts if the user hesitates. The voice message feature can be turned on or off for each station according to the user's preference (PC programmable).

Stentofon can deliver customized messages on request. You can also customize your own messages for use on the board by using the AlphaVoC tool. The tool is intended for use by skilled programmers.

Specification

Order Number:	100 9304 001 xx = 01 Norwegian xx = 02 Finnish xx = 03 Danish xx = 04 German xx = 05 English xx = 06 French xx = 11 Swedish
Operation voltage:	5 and 15 V DC
Dimensions (WXHXD):	10 mm x 230 mm x 263 mm 0.39"x8.97"x10.26" Double Extended Europe Format
