

REF. 5710

1WAY HALO VIDEO KIT 230V

The most cutting-edge video door entry system, available in kit for single-family houses and offices. Loft monitor included. Perfect Future The most sophisticated technology is user friendly, thanks to a graphic LCD screen with 128 x 128 pixels. Includes a colour camera with a wide observation field. It has a pan&tilt regulation system and a built-in illumination. The proximity reader is concealed behind the display. Presenting a proximity card in front of the panel, the door release is activated automatically. The kit includes 6 cards. Allow up to 350 different users. The screen converts into an electronic sign or card slot that can be customised to indicate the name os the building, street, etc. Incorporates a thermometer and a clock, indicating the date, time and temperature outside the home. The backlightinh multifunction pushbuttons allow the friendly use of the system: calling, conversation, menu, etc...
