

dataLog[®]

deister electronic provides high-end technology for guarding, maintenance and facility management markets.

Thanks to an ongoing innovation process dataLog[®] has developed into standard solution for all applications where checkpoints and service information are to be managed with a high grade of efficiency.

de Reporter / WK Reporter – the Data Transfer Units

de Reporter/ WK Reporter

The Reporter is the perfect standalone solution if evaluation is required at a remote site without a PC.

The Reporter reads the data from the data collectors and stores them in its memory.

The Reporter can be downloaded with a modem via landline, GSM connection or directly with a PC. It is also possible to upload master data into the Reporter and configure the requirements of the patrols so that reports can be printed directly to an attached suitable printer.

Your Advantages at a Glance

- **Flexible use** independent from office and PC
- **Simple operation** at any location
- **Data can be downloaded from the head office at any time** – as well as master data and parameters can be easily modified
- **Printing of reports without PC** directly at the patrol location
- **Can be used with standard and GSM modems**
- **No wear and tear** due to contactless reading

Technical Data

Dimensions (mm):	130 x 60 x 200
Housing	ABS plastic
Power supply:	12V / 640 mA
Interface:	RS 232, parallel printer interface
Memory capacity:	20 patrols (24 characters each) 200 checkpoints (24 characters each) 10,000 readings

Accessories

Serial cable for PC or modem

Wall plug supply 12V / 640 mA

Suitable Data Collectors

de Reporter: **duostar** and the previous types de prox, de watch

WK Reporter: **magprox** and the discontinued data collectors mag II, mag III, magscan, proxscan, triscan, WK 1000, WK 1100

Suitable Software

Master Patrol, Easy Patrol I, Easy Patrol II
